“Gray cabinets and stark white walls didn’t suit my clients’ big personalities. I energized the space with a bold yet approachable peony color. People always rave to them about how fabulous it is for a kitchen!”

—Alicia Hassen, Brooklininteriors, Brooklyn, NY

“For a lover of all things mid-century, I went with a golden yellow in her dining area. It’s strong enough to make the vintage tulip table and chairs pop, but it also has a natural side, like the color leaves change to in the fall.”

—Ashley Christensen, TVL Creative, Denver, CO

### blue cue

BY DUNN-EDWARDS

“That cornflower blue in the Clé Tile floors inspired the color of the bathroom’s vanity. Its serene lightness says ‘just relax and breathe,’ exactly what you want in an escape.”

—Rachel Chulew, designHAUS 24, Dallas, TX

“What do you do for two little girls who *had* to have ‘happy’ walls that are ‘like a ballerina’? Give them a fun pink that practically dances around the room. They applied the finishing touch, sparkly heart stickers.”

—Georgia Zikas, Georgia Zikas Design, West Hartford, CT

“Landscape art inspired a media room’s color palette. After doing forest green for the walls, I hung luxe curtains in the same shade to give it a real cozy effect. It might make people nervous to pair blue and green but in similarly deep hues, they go together.”

—Kevin Francis O’Gara, @kfogara, Atlanta, GA
